

More than the standard

Your Partner for Testing, Certification, and Market Access

Innovative Services for
modern Technologies

cetecom
advanced

New technologies require reliable testing and approval partners. As a leading international service provider for conformity assessments, **cetecom advanced** supports you in the fast and safe introduction of your products – worldwide and in compliance with standards.

We offer you a comprehensive service portfolio for testing, certification, and worldwide market approval of your products. We are at your side with a personal contact person and digital tools in every phase of the project.

Who is cetecom advanced?

About us

We are part of the RWTÜV Group and a service provider for testing and international certification. As a pioneer and partner to our customers, we have been ensuring fast, reliable, and secure market access for our customers' products for almost 30 years.

Our Locations worldwide

We have test laboratories all over the world: two in Germany (Saarbruecken/Saarland and Essen/NRW), Yokohama/Japan and Anyang/Korea.

History and Development

Originating from a former government agency (BZT), **cetecom advanced GmbH** (a merger of CTC advanced GmbH and CETECOM GmbH) has developed into a leading provider of testing and certification services over the course of nearly 30 years (including almost 25 years with a SmartCard testing center and over 15 years with a battery safety laboratory).

Our Services

Regulatory Testing Services

Our portfolio includes regulatory testing in the areas of EMC, Radio, Electrical Safety, Battery/Environmental Testing, and Cybersecurity.

SmartCard & Identification

At our test laboratories in Saarbruecken, Yokohama, and Anyang, we offer testing and certification according to specified payment schemes for telecommunications, banking/finance, transportation, and healthcare.

International approvals

Our in-house certification bodies (NB, TCB, FCB, and RCB) and our global approvals team (ITA) are in direct contact with authorities worldwide to ensure successful market access.

Special certification services

In addition to regulatory and country-specific approvals, we offer other special certification services, such as emergency call systems (eCall, ERA-GLONASS), CB Scheme, PTCRB, Qi, WiFi Alliance, and Bluetooth SIG.

- Complete service from a single source
- Decades of experience
- Individual test plans
- Global approval management
- Extensive accreditations
- Project support at every step
