- test during product development state, before delivery to the laboratory
- keep your easy access to our product during test execution

CETECOM ADVANCED ONLINE HOST EXAMPLE – GERMAN BANKING INDUSTRY

cetecom advanced experts can setup a test environment tailored to the customer's product. The customer perform debug tests before he reaches out to the classic laboratory testing. The tests are executed via an online platform that presents the technical communication details for analysis and validation.

- **cetecom advanced** Online Host simulates a virtual Bank within GBIC test bench system
- **cetecom advanced** Online Host enables web based connected communication with ATM system on customer premises
- Customer benefits from real-time test results
- **cetecom advanced** Online Host will be continually extended with new functions
