

More than the standard

# CCC Digital Key<sup>®</sup> Testing & Certification

Our services as ATL  
(Authorized Test Lab) for Digital Key

The **Car Connectivity Consortium (CCC)** Digital Key is a standardized technology that enables mobile devices to store, authenticate, and share digital keys for vehicles in a secure, privacy-preserving way that works everywhere.

CCC certification ensures global interoperability and compatibility for products and experiences. **cetecom advanced** is a CCC Authorized Testing Laboratory (ATL) aiming to provide full functional testing for Digital Key applet and vehicle providers.

### Our Test Scope

- Digital Key Applet Functional Compliance Testing**

- Testing the functionality of digital key applet on a secure element

- End-to-End Interoperability Testing**

- Testing the interaction between the mobile device and the vehicle

### The Certification Process

- Certification Application**

- Client:** Submits online application
- CCC:** Assigns certification identifier

- Product Analysis**

- Client:** Provides forms (ICS, IXIT) and samples
- ATL:** Submit Test plan (ICS, IXIT and TCMT)
- CCC:** Approves test plan

- Product Evaluation**

- ATL:** Sample evaluation & report
- CCC:** Approves of evaluation report

- Certification Decision**

- CLIENT:** Completes requirements
- CCC:** Final certification decision

### Benefits of CCC Digital Key Certification

- Enhanced credibility and trust among consumers
- Proven global interoperability
- Recognized value through official logo

### Your reasons to choose cetecom advanced

- Global coverage of authorized test laboratories at multiple locations
- Many years of experience in the professional protocol and application testing of smart products in the financial and identification industry
- Constantly expanding services, always at the cutting edge
