cetecom
advanced

Global certification expertise for wireless technologies

Your complete package for over 180 countries and approval regimes

With our in-house approval experts, we offer you everything from a single source - from testing to certification, including a personal contact person and access to our CERT certification software.

Anyone who wants to market products globally, must comply with various country-specific requirements regarding certification and homologation for international market approval.

Let cetecom advanced simplify and carry out the conformity process to ensure the timely launch of your products in the target markets.

Europe (CE marking)

- Tests in accordance with the Radio Equipment Directive (2014/53/EU) in our own laboratories (up to 500 GHz)
- Experienced certification team including Notified Body

USA (FCC certification)

- ISO/IEC 17025 accredited laboratories
- Only FCC-recognized European laboratory covering all 18 FCC scopes
- Experienced certification team including Telecommunication Certification Body (TCB)
