

More than the standard

Testing services for medical devices / medical technology

We test your medical device -
for stationary or mobile use.

Medical technology is dynamic, technologically advanced, and continuously evolving to meet the needs in the detection and treatment of diseases.

Medical devices must therefore meet strict safety and performance requirements. Due to the increased use of wireless technologies, they may also fall under the Radio Equipment Directive 2014/53/EU (RED).

We support our clients in the medical technology sector with the testing and certification of their products, ensuring successful market access.

Testing of Electrical Safety

- EN/IEC 60601-1
Including the required technical documentation such as risk management (ISO 14791), usability (EN/IEC 60601-1-6), software (EN 62304), etc.
- EN/IEC 60601-1-8 /-11 /-12
- EN/IEC 60601-2-4 /-18 /-25 /-35 /-66
- EN/IEC 80601-2-30
- EN/IEC 61010-2-040 /-101

On Top

- Accredited testing laboratory for the CB scheme
- Partner testing laboratory (PTL) for NRTL approvals

Electromagnetic Compatibility (EMC)

- EN/IEC 60601-1-2
- EN/IEC 60118-13
- EN/IEC 61326-2-6

- Testing of medical devices and the wireless technologies used
- Extensive experience in the required testing services
- Globally recognized test reports

Testing of Wireless Technologies in Medical Devices

- Bluetooth®
- Wi-Fi
- Wireless Power Transfer
- Radar
- NFC etc.

Additional Services for Medical Technology

- Coexistence testing according to ANSI/USEMCS C63.27
- Environmental simulation testing
- Battery safety testing
- In-house certification bodies
(NB – Europe, TCB – USA, FCB – Canada, RCB – Japan)
- International Type Approval (ITA)

- Everything from a single source – from testing to global certification
- Always up-to-date with the latest developments in medical technology
- Individual solutions tailored to your needs
