cetecom advanced

Company introduction

cetecom advanced

The best of two worlds

CTC advanced and CETECOM merge to form cetecom advanced

This merger creates a unified company from two leading suppliers in the field of testing and certification of electronic products with or without wireless interfaces, which meets the requirements of its customers even more comprehensively.

Both companies have been among the absolute know-how carriers in their industry for 25 years. The service portfolio of the two entities, which together belong to the RWTÜV Group, coincides in many accredited areas and additionally complements each other with further services.

The merger creates a company with a comprehensive range of diverse high-quality laboratory and certification services under one roof.

cetecom advanced

The best of two worlds

With just under 350 employees, the globally operating cetecom advanced is a leader in the field of testing and certification of electronic products with or without radio interfaces and holds locations in Europe, Asia and the USA.

cetecom advanced

The best of two worlds

cetecom advanced offers a comprehensive range of diverse high-quality laboratory and certification services under one roof.

Existing resources are perfectly utilized, thus increasing the performance and efficiency of both companies in the interests of their customers.

Our services

cetecom advanced testing services

Regulatory & Performance | Environmental Simulation & Battery Safety | SmartCard-Technologies

REGULATORY AND PERFORMANCE

Radio / Cellular / EMC / Safety / Health / SAR

Bluetooth® / WLAN / Radar 5G New Radio / Zigbee / DECT

eCall / ERA-GLONASS

ENVIRONMENTAL SIMULATION BATTERY SAFETY

Mechanical:

Vibration / Shock / Crash
Nail Penetration / Crush / Roll Over Device

Climatic & Corrosion:

Temperature shock
Salt spray / Low pressure / Dust IP testing
Sun simulation / Chemical Resistance

Electrical:

HV DC Supply and Load / Short Circuit Tester / Abuse and Propagation

SMARTCARD TECHNOLOGIES

EMVCo / Mastercard / Visa AMEX / Discover

Card / Reader / Terminal / mPOS SoftPOS / ATM / Cloud / EMVCo 3-D Secure

Deutsche Kreditwirtschaft (DK) German Banking System

Mobile Testing (NFC, VMPA)

eHealth / eTicketing (VDV) ePassport/eID (BSI)

Biometric Card Testing

KLSC (Korea Local Smart Card)

Smartcard Tools for internal testing solutions and individual solutions acc. to customer requirements

cetecom advanced certification and consulting services

Worldwide approval - qualified service

CERTIFICATION SERVICES

Notified Body Services for Europe (RED + EMC)

TCB Services for USA (FCC)

FCB Services for Canada (ISED)

RCB Services for Japan (MIC)

CERTIFICATION SERVICES

International Type Approval

Radio Type Approval Handling (>180 countries)

Research Services

Strategy consulting for global certifications

CONSULTING SERVICES

Technical Consulting

Consulting on test and certification

Requirement Engineering for new technologies

Cases studies
Training and Seminars

Technical trainings

In house seminars on certification requirements

But why cetecom advanced?

cetecom advanced

What makes us different from others?

OUR EVOLUTION

Continuous enhancement of accreditations and test schemes

OUR EXPERIENCE AND COMPETENCE

30 years of experience in our core areas

More than 300 high qualified engineers working on your products

OUR PERFORMANCE

Dedicated project manager (single point of contact / direct communication)

Quality in focus (high quality test services)

Fast and flexible availability of test slots in all required laboratories

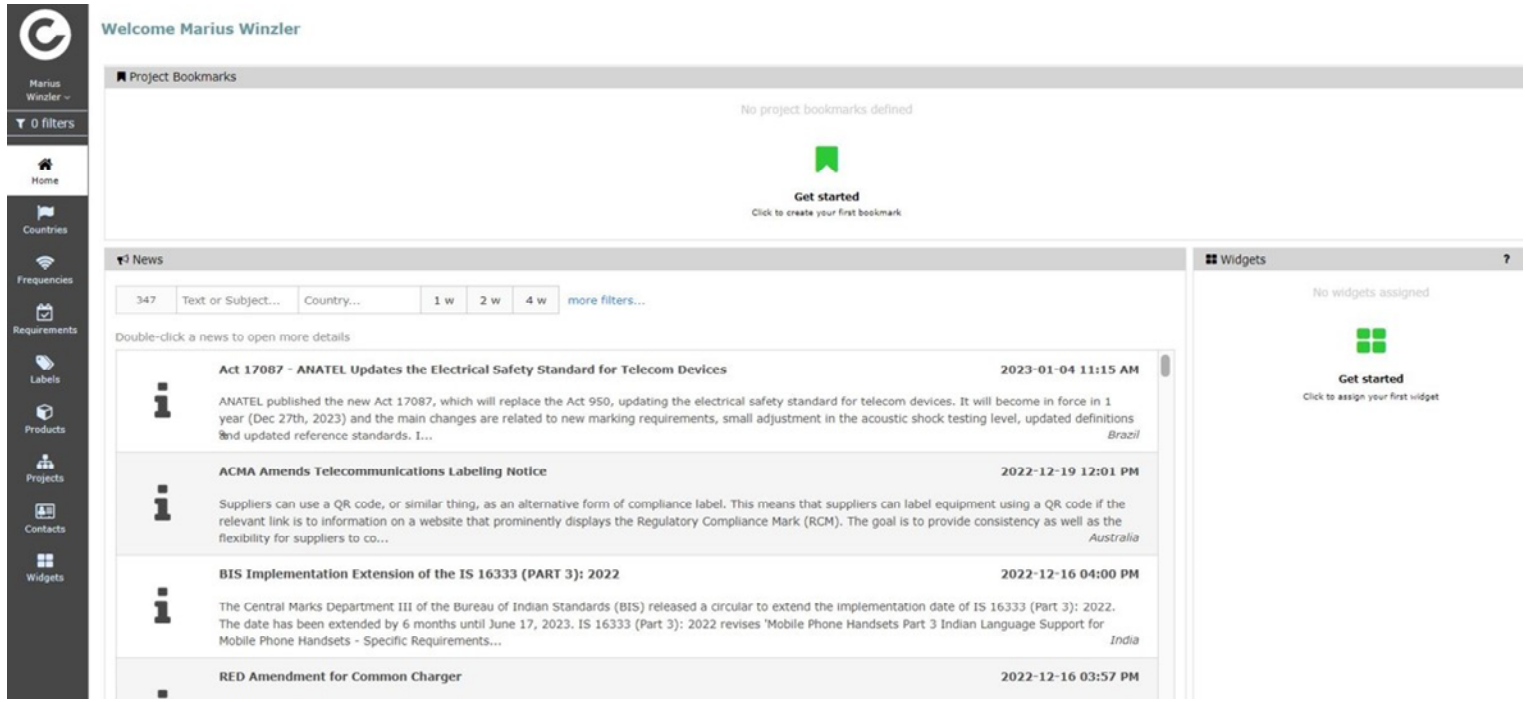
OUR DIVERSITY

Unique Portfolio with many services

One stop shopping strategy with a global availability

cetecom advanced

CERT



CERT is your guarantee for effective project management

Our innovative software tool for digital certificate management and monitoring simplifies your processes and gives you a transparent view of all your ongoing certification projects at cetecom advanced at any time.

Further than that, the digital certificate management helps you keep an overview about all your approvals.

cetecom advanced

What makes us different from others?

Digital project management – comprehensive and transparent

CERT provides you with continuous insight into the current status of your approval project and optimizes coordination throughout the approval process.

- 2-way communication for an efficient exchange of information about the projects
- Overview of project milestones on country level
- Transparent information on the remaining steps to be completed, including an automated notification system
- Detailed reporting function including download option

cetecom advanced

What makes us different from others?

Digital certificate management – clear and secure

With CERT you always have the status quo of your approved products in view with the help of a simple traffic light system and are automatically notified if there is an acute need for action.

- Which active certificates do I currently have?
- Is there an acute need for action because a certificate will expire within the next few months (keyword: renewal)?

Automated notifications allow you to renew your certificates in a timely manner.

Many thanks.
